

Hitech Drum Reconditioners specializes in reconditioning and refurbishing of 210L metal, plastic drums and 1000L Intermediate Bulk Containers (IBC) specifically for chemicals industry. The drums are bought from companies and individuals, and then reconditioned for internal use and excess sold to external markets.

We follow very strict procedures in the reconditioning process in compliance to environmental bylaws .

We only use accredited and reputable Waste Management Companies to remove our solid and effluent waste (including sludge).

Our reconditioning capacity is approx. 20000 drums/ month.

*Exceeding Expectations*
